## PROFESSIONAL SUMMARY

Software Developer with hands-on full-stack development experience and training in Artificial Intelligence. Experienced in building responsive React interfaces, REST APIs, authentication flows, and database-backed applications. Developing practical AI/ML projects involving computer vision, text classification, and retrieval-augmented generation (RAG). Seeking Software Engineer or AI/ML Engineer opportunities where I can contribute to reliable software and data-driven features.

---

## TECHNICAL SKILLS

**Programming:** Python, JavaScript (ES6+), SQL

**Frontend:** React.js, HTML5, CSS3, Tailwind CSS, Redux

**Backend & APIs:** Node.js, Express.js, FastAPI, REST APIs, JWT authentication

**Databases & Data:** PostgreSQL, MySQL, MongoDB, NumPy, Pandas

**AI/ML:** Machine Learning fundamentals, data preprocessing, feature extraction, model evaluation, scikit-learn, TensorFlow/Keras, CNNs, transfer learning (MobileNetV2), NLP, sentiment analysis, embeddings, FAISS, RAG fundamentals

**Tools:** Git, GitHub, Postman, Streamlit, VS Code, Google Colab

---

## EXPERIENCE

Full Stack Developer | Murphys Technology

Duration: 6  months

- Contributed to frontend and backend development for client-facing web applications.

- Developed responsive user interfaces for a Fashion Designer web application.
- Built the Kubaer Finance backend admin panel for administrative workflows and data management.
- Implemented RESTful APIs with Node.js and Express.js, JWT-based authentication, and database integration.
- Collaborated with team members to troubleshoot issues and improve application reliability.

---

## INTERNSHIP

### Software Development Intern
Nepal Electricity Authority (NEA)

- Contributed to software development tasks.
- Participated in the development of an M.D. Scheduling project.

---

## SELECTED PROJECTS

**1. ePharmacy — Integrated AI Full-Stack Pharmacy Management Platform**

**Technologies:** React.js, FastAPI, Python, PostgreSQL, SQLAlchemy, JWT, REST API

- Building a pharmacy platform with product browsing, user authentication, and role-aware workflows.
- Implemented backend authentication and API structure using FastAPI, SQLAlchemy, and PostgreSQL.
- Developed prescription upload and pharmacist review workflows for approval or rejection.
- Organized backend code into models, schemas, routes, and services to support maintainability.
- GitHub: https://github.com/PrabeshThapa3522/ePharmacy.git

---

**2. Smart Waste Classifier — Computer Vision**

**Technologies:** Python, TensorFlow/Keras, CNN, MobileNetV2, Streamlit

- Built an image-classification project to classify waste images into cardboard, glass, metal, paper, and plastic.

- Implemented and evaluated a custom CNN and a MobileNetV2 transfer-learning model.
- Created a Streamlit interface for image-based predictions and tracked validation performance.
- GitHub: https://github.com/PrabeshThapa3522/Smart_Waste_Classifier.git

---

**3. University Assistant — RAG Chatbot**

**Technologies:** Python, sentence-transformers, FAISS, Ollama, Streamlit

- Developed a retrieval-based university information assistant using document embeddings and FAISS similarity search.
- Connected retrieved context to a local language model to generate domain-specific answers.
- Structured source documents for retrieval and tested the embedding pipeline.
- GitHub: https://github.com/PrabeshThapa3522/University_Chatbot.git

---

**4. Sentiment Analysis System**

**Technologies:** Python, Pandas, scikit-learn, TF-IDF, Logistic Regression, TensorFlow/Keras

- Working on text sentiment classification for positive, negative, and neutral categories.
- Exploring TF-IDF with Logistic Regression and deep-learning sequence models such as BiLSTM and GRU.
- GitHub: https://github.com/PrabeshThapa3522/Sentiment_Analysis_System.git

---

## ADDITIONAL WEB PROJECTS

**CineWorld:**
Movie-booking application with user/admin panels, JWT, 2FA, and Redux.
GitHub: github.com/PrabeshThapa3522/CineWorld

**MD-Schedule:**
Meeting scheduling dashboard with role-based workflows and date/status management.
GitHub: github.com/PrabeshThapa3522/NEA

**PingTester:**
Server-monitoring dashboard showing ping status and packet-loss categories.
GitHub: github.com/PrabeshThapa3522/PING

**Fitness:**
Fitness application with interactive workout sections, responsive UI, and reusable React components.
GitHub: https://github.com/PrabeshThapa3522/Fitness.git

---

## EDUCATION & TRAINING

BSc in Computer Science and Information Technology (BSc CSIT)
— Nepalaya College, Kathmandu | 69.33%

Artificial Intelligence Training
— Broadway Infosys

---

## PROFESSIONAL STRENGTHS

Problem-solving • Team collaboration • Communication • Adaptability • Continuous learning
